## Mission Statement

I'm a screenwriter and storyteller who builds entire worlds from scratch—each one rooted in empathy, emotional truth, and imagination. As someone who is neurodivergent (CPTSD, ADHD, and autism), I bring a distinct perspective and resilience to my work. I've spent years navigating life's complexities, and now channel those experiences into creating stories that uplift, resonate, and connect. At 43, I'm proud to say I've found my voice—and I use it to remind others that no matter where you've been, there's always a place for you in a good story.

## Professional Summary

A passionate, self-taught screenwriter and world-builder focused on high-concept storytelling across comedy, drama, animation, and speculative fiction. Creator of multiple original series, pilots, and screenplays with strong comedic voice, emotional intelligence, and a sharp eye for both satire and structure. Actively developing multiple IPs under the banner of Nobody Labs Productions, with one short film entering production and multiple pitch-ready projects supported by complete series bibles.
